Stamp Out Subversion

To The News and Courier:

I have addressed the following to South Carolina's representatives and senators in Washington:

It is with a feeling of the utmost urgency that I write to each and every one of you and request that each one of you take an active part in attempting to stamp out the subversive elements in the State Department, CIA, Pentagon and all other segments of the executive branch of our government.

I most particularly urge that Congress take immediate steps to investigate the un-American handling of Gen. Walker's removal from command in Europe.

I urge the Congress to immediately start a complete investigation of the Central Intelligence Agency — and before another "planned" fiasco such as Cuba is allowed to develop (And how is it that they did not know of the revolt in Korea? Or what was going to take place in Laos?).

I urge that I request support of the move to allow any deduction from income tax returns for any contributions to the tractors for Cuban Captives.

I strongly urge that a concerted effort be directed toward more responsibleness in our fiscal policies, internally and also foreign.

In regard to the CIA situation, I should like members of Congress to take a very close look before a successor to Mr. Allen Dulles is selected.

ROBERT T. HALL
Fort Sumarle Point.
